# 01

# Executive Summary

Gravity KSA requires a new website that reflects its position as a leading events and exhibitions company in Saudi Arabia. The current website is down, but the domain remains active via GoDaddy.

We propose developing a cutting-edge, design-forward website with a Web 3.0 aesthetic that creates immersive user experiences through advanced animations, 3D elements, and interactive storytelling. The website will showcase Gravity's portfolio, communicate brand values, and generate leads, all while achieving strong SEO performance for visibility in the Saudi market.

**Key Deliverables:**

- Modern, interactive website with Web 3.0 design language
- Bilingual support (English/Arabic) with full RTL implementation
- SEO optimized for Saudi Arabia market visibility
- CMS for easy content management
- Year 1 hosting included

# 02

# Project Understanding

## Business Context

Gravity KSA operates in the events and exhibitions industry a sector where visual impact, creativity, and the ability to deliver memorable experiences are paramount. The website must serve as a digital extension of this capability, immediately communicating professionalism, creativity, and scale.

## Target Audience

- Corporate clients seeking event management partners
- Government entities and semi-government organizations
- Exhibition organizers and trade show participants
- Marketing and PR agencies seeking production partners
- International brands entering the Saudi market

## Core Objectives

| | |
|---|---|
| **Brand Positioning** | Establish Gravity as a premium, innovative events company through sophisticated design |
| **Portfolio Showcase** | Display past events with rich media, creating aspirational content for prospects |
| **Lead Generation** | Convert visitors into inquiries through strategic CTAs and contact mechanisms |
| **SEO Visibility** | Rank for event-related searches in Saudi Arabia and the GCC region |

# 03

# Proposed Sitemap

The following information architecture balances comprehensive content with intuitive navigation:

| Primary Pages | Secondary Pages | Utility Pages |
|---|---|---|
| 1. Home | Service Detail (x5) | Privacy Policy |
| 2. About Us | Project Case Study | Terms of Service |
| 3. Services | Blog Article | 404 Error |
| 4. Portfolio | Team/Leadership | Thank You |
| 5. Contact | | |
| 6. Blog/Insights | | |

## Proposed Services Structure

Each service gets a dedicated page with detailed information, process breakdown, and relevant portfolio examples:

- Event Management & Production
- Exhibition Stand Design & Build
- Conference & Corporate Events
- Brand Activations & Experiential Marketing
- Audio Visual & Technical Production

# 04

# Page Specifications

## 4.1 Home Page

The homepage serves as the primary brand statement and conversion driver. It must immediately communicate Gravity's capabilities while creating an emotional connection.

| Section | Description |
|---|---|
| **Hero Section** | Full-screen video/image with parallax effect, animated headline, primary CTA. Auto-playing showreel of past events creates immediate impact. |
| **Services Overview** | Animated service cards with hover effects revealing brief descriptions. Each card links to detailed service page. |
| **Featured Projects** | Interactive portfolio carousel with smooth transitions. 3-4 hero projects with large imagery and quick facts. |
| **Statistics Bar** | Animated counters showing key metrics: Events Delivered, Happy Clients, Years Experience, etc. |
| **Client Logos** | Infinite scroll logo marquee showcasing major clients. Adds credibility and trust signals. |
| **Testimonials** | Rotating testimonial cards with client photos, company logos, and quotes. |
| **CTA Section** | Bold call-to-action with background visual. "Start Your Project" or "Get a Quote". |
| **Latest Insights** | 3 recent blog posts with thumbnails, creating content freshness signals for SEO. |

## 4.2 About Us Page

| Section | Description |
|---|---|
| **Page Hero** | Cinematic brand video or team photo with overlay text introducing Gravity's story. |
| **Company Story** | Timeline-style narrative showing company evolution. Scroll-triggered animations reveal milestones. |
| **Mission & Vision** | Split-screen layout with mission and vision statements. Subtle background animations. |
| **Core Values** | Icon-based value cards with micro-animations on scroll into view. |
| **Leadership Team** | Team grid with professional photos, hover reveals bio details. Links to LinkedIn. |
| **Certifications** | Awards, certifications, and industry memberships displayed as trust signals. |

## 4.3 Services Page

| Section | Description |
|---|---|
| **Services Hero** | Dynamic header with animated text: “We Create Experiences” or similar tagline. |
| **Service Cards** | Large interactive cards for each service. Background image shifts on hover, reveals quick description. |
| **Process Section** | Visual timeline showing how Gravity works: Discovery → Design → Execute → Deliver. |
| **Why Choose Us** | Differentiators presented as benefit cards with supporting statistics. |

## 4.4 Portfolio Page

The portfolio is the most critical conversion tool, prospects evaluate capabilities based on past work.

| Section | Description |
|---|---|
| **Filter Bar** | Category filters (Events, Exhibitions, Conferences, Activations) with smooth transition animations. |
| **Project Grid** | Masonry or uniform grid layout. Each tile shows project image, client name, event type. Hover reveals quick stats. |
| **Featured Projects** | Top 3 hero projects displayed larger with extended previews. |
| **Load More** | Infinite scroll or “Load More” button for additional projects without full page reload. |

## 4.5 Project Case Study Template

Each project clicks through to a detailed case study page:

- Full-width hero image/video of the event
- Project overview: Client, Date, Location, Event Type, Scope
- Challenge & Brief: What the client needed
- Solution & Approach: How Gravity delivered
- Image Gallery: Lightbox gallery with 10-20 high-quality images
- Video Embed: Event highlight reel (if available)
- Results & Impact: Attendance numbers, media coverage, client feedback
- Client Testimonial: Quote from the client
- Related Projects: Links to similar case studies

## 4.6 Contact Page

| Element | Description |
|---|---|
| **Contact Form** | Multi-step form: Contact details → Project type → Budget range → Timeline. Reduces friction and qualifies leads. |
| **Direct Contact** | Phone, email, WhatsApp with click-to-action functionality. |
| **Office Location** | Interactive map embed with office marker. Address and directions. |
| **Social Links** | Instagram, LinkedIn, Twitter/X links with branded icons. |
| **Office Hours** | Working hours displayed clearly (Saudi business hours). |

## 4.7 Blog/Insights Page

Content marketing hub for SEO and thought leadership:

- Featured Article: Large hero article at top
- Category Filters: Events Trends, Industry News, Behind the Scenes, Tips & Guides
- Article Grid: Card-based layout with thumbnails, titles, dates, read time
- Newsletter Signup: Email capture for content updates
- Search: Article search functionality

# 05

# UI/UX Design Direction

The design will embody a modern Web 3.0 aesthetic, immersive, interactive, and visually striking while maintaining usability and performance.

## 5.1 Visual Style

| Element | Direction |
|---|---|
| **Color Palette** | Dark mode primary (deep blacks, charcoals) with vibrant accent colors. Creates cinematic, premium feel aligned with events industry. |
| **Typography** | Bold, modern sans-serif headlines (e.g., Clash Display, Space Grotesk). Clean body text (Inter, DM Sans). Arabic: IBM Plex Sans Arabic or Tajawal. |
| **Imagery** | Full-bleed photography, video backgrounds, high-contrast visuals. Images treated with subtle overlays and grain for cohesive look. |
| **Spacing** | Generous whitespace, asymmetric layouts, overlapping elements creating depth and visual interest. |
| **Shapes** | Organic curves, blob shapes, and geometric accents. Avoid rigid grids, embrace creative, dynamic layouts. |

## 5.2 Animations & Micro-Interactions

| | |
|---|---|
| **Scroll Animations** | Elements fade in, slide, or scale as user scrolls. Parallax effects on hero sections. Text reveals character-by-character or word-by-word. |
| **Hover Effects** | Image zoom, color shifts, card lifts with shadow changes. Cursor effects (custom cursors, magnetic buttons). |
| **Page Transitions** | Smooth page-to-page transitions with fade or slide effects. No jarring full-page reloads. |
| **Loading States** | Custom loading animations reflecting brand. Skeleton screens for content loading. |
| **3D Elements** | Subtle 3D transforms on cards. Optional WebGL background effects (particles, gradients) on key pages. |
| **Cursor Interactions** | Custom cursor that changes based on interactive elements. Magnetic effect on buttons. |

### 5.3 Responsive Design

| Desktop | Laptop | Tablet | Mobile |
|---|---|---|---|
| 1920px+ | 1024-1919px | 768-1023px | 320-767px |

Mobile-first approach with touch-optimized interactions. Reduced animations on mobile for performance. Thumb-friendly navigation with sticky header and floating CTA.

# 06

# Technical Approach

### 6.1 Technology Stack

| Layer | Technology |
|---|---|
| **Framework** | Next.js 14 (React)  Server-side rendering for SEO, optimal performance |
| **Styling** | Tailwind CSS + custom CSS for advanced animations |
| **Animations** | GSAP (GreenSock) for scroll animations, Framer Motion for component transitions |
| **3D/WebGL** | Three.js for optional 3D elements (performance-conscious implementation) |
| **CMS** | Sanity.io or Strapi Headless CMS for content management |
| **Forms** | React Hook Form with Zod validation, integration with email service |
| **Analytics** | Google Analytics 4, Google Tag Manager, Search Console |
| **Hosting** | Vercel or AWS (CDN-backed for global performance) |
| **Domain/DNS** | Configuration via existing GoDaddy account |

### 6.2 SEO Implementation

**Technical SEO**

- Server-side rendering for search engine crawlability
- Structured data (Schema.org) for events, organization, articles
- XML sitemap and robots.txt configuration
- Core Web Vitals optimization (LCP, FID, CLS)
- Image optimization with next-gen formats (WebP, AVIF)

**On-Page SEO**

- Keyword research for Saudi Arabia events market
- Optimized meta titles, descriptions, and headers

- Internal linking strategy
- Open Graph and Twitter Card tags for social sharing

**Local SEO**

- Google Business Profile optimization
- Local business schema markup
- Arabic language SEO considerations

# 07

# Timeline & Deliverables

| Week | Phase | Deliverables |
|---|---|---|
| 1 | **Discovery** | Brand audit, competitor analysis, content strategy, sitemap, SEO keywords |
| 2-3 | **UI/UX Design** | Wireframes, high-fidelity mockups, interactive prototype, design system |
| 4-6 | **Development** | Frontend build, animations, CMS setup, responsive implementation |
| 7 | **Content & CMS** | Content migration, CMS training, Arabic translations |
| 8 | **SEO & Testing** | SEO implementation, QA testing, performance optimization |
| 9 | **UAT** | User acceptance testing, feedback rounds, final revisions |
| 10 | **Launch** | Deployment, DNS configuration, monitoring, handover documentation |
| **TOTAL DELIVERY** | | **10 Weeks from project kickoff** |

**Client Dependencies:**

- Brand assets (logo files, brand guidelines if available)
- Content: Company copy, service descriptions, team bios
- Portfolio: High-resolution event photos, videos, case study details
- Access: GoDaddy domain credentials for DNS configuration
- Timely feedback at each milestone (48-hour turnaround recommended)

# 08
